THE PHILOSOPHY OF RAIN. TO understand the philosophy of this beautiful and often sublime phenom: enon, so often witnessed and so very essential to the existence of plants and animals, a few facts derived from observation and a long train of experiments, must be remember-

1. Were the atmosphere here, everywhere, and at all times, of a uniform temperature, we should never have rain, hail or snow. The water absorbed by it in evaporation from the sea and the earth's surface, would descend in an imperceptible vapor, or cease to be absorbed by the air when it is once fully satu-

2. The absorbing power of the atmosphere, and consequently its capacity to retain humidity, is apportionately greater in warm than in cold air. The air near the surface of the earth is warmer than it is in the regions of clouds. The higher we ascend from the earth the colder do we find the atmosphere .-Hence the perpetual snow on very high mountains in the hottest cli-

Now, from continued evaporation the air is highly saturated with vapor, though it be invisible and the sky cloudless, if its temperature is suddenly reduced by cold currents descending from above, or rushing from a higher to a lower latitude, its capacity to retain moisture is diminished, clonds are formed, and rain is the result. It condenses. cools, and like a sponge filled with water and compressed, pours out the water which its diminished capacity cannot hold.

ORDERLY PEOPLE. There are persons who are never easy unless they are putting your books and papers in order-that is, according to their notions of the matter-and hide things, lest they should be lost, where neither the owner or anybody else can find them. If anything is left where you can find it, it is called litter. There is a pedantry in housewifery as well as in the gravest concerns. Sir Walter Scott complained that whenever his maid servant had been in his library, he could not set comfortably to work again for several days.

BORES. The most vigilant constabulary is no safeguard against bores. They can pounce upon their prey in the common thoroughfare, under the very nose of uninformed authority, without incurring the slightest peril. They can hold you, but no policeman will hold them ; made glad. nor will an action for unwarranted arrest lie against them in a court of equity. It ought to, perpaps, but it won't. They can even invade your domicile and insist upon the loan of your ears, with entire impunity. And yet ordinary burglary is a trifle compared with such an intrusion upon your peace and privi

AN UNWISE MOVE .- We notice that the House committee of agriculture has reported a bill amenda tory of the statute establishing the Board of Agriculture, Manufac tures and Mining, by which that-Board is released from its connection with our manufacturing and mining interests, and is made simply a Board of Agriculture.

This is in accordance with the rule in other States, we are aware, but still, so intimately are these three great interests interwoven in Vermont, and so important, also, is it that none of our industries should lack whatever impetus the labors of such a board may be able to impart to them, that we cannot regard it as the part of wisdom to limit its functions, as this bill does, to the

promotion of agriculture alone. We trust that our manufacturers miners and quarrymen are not so indifferent to the matter as to allow it to go by default, through lack of attention and action on their part. And we believe the farmers themselves are deeply concerned in maintaining the present status and func-tions of the board, since the promotion of these other interests is directly to their profit and advantage, as tending to secure for them the best of all markets-a home market-for their productions .- Daily Journal, Montpelier.

-According to the statistics re turned to General Eaton, United States Commissioner of Education, the endowments of preparatory schools in Vermont are as follows: Episcopal Institute, Burlington, \$10,000; Castleton Seminary, \$30, 000; Burr and Burton Seminary Mauchester, \$40,000; Beeman Academy, New Haven, \$11,420; Caledonia County Grammar School Peacham, \$16,000; St. Johnsbury Academy \$10,000; Green Mount Perkins Academy, Woodstock, \$12,

AT the recent fair of the Massachusetta Charitable Mechanic Association, the following awards were made to Vermont manufacturers :

Silver medals to the Fairbanks' diamond try squares and bevels, and Kersey cloth made at the Winooski mill : bronze medal to clapboard planer, made by the Lane Manufacturing Company, of Montpelier; and diploma to improved scaffeld, made by L. A. Sleeper of Poultney; mill-stone hammer, J. Cummings of West Charleston; lenses, H. S. Walbridge, of North Bennington; and broadcloth, Win-

THE Arkansas Republican, of Lit-tle Rock, has had a standing offer for the past two years to pay \$1,000 for evidence, in a single instance, where a Southern white man has ever been punished as the law directs for killing a negro. The offer remains untaken.

PEABODY MEDICAL INSTITUTE When a thing is coun tericited, is ita proof offits excellence and popularity. The Peabody Medical Institute is a case in point. Founded in good faith many years ago, and the only establishment of the kind in the country, its success and ever-increasing popularity finally caused the name (Medical Institute) to be pirated and adopted by a lot of infamous quacks empirics and pretenders, who have been en deavoring to cheat the public by sailing under a stolen flag. Ayers Huir Vigor restoring to Gray Hair its natural Vitality and Color.

gloss and freshness of youth. Thin hair is thickened, fallen hair checked, and baldness often, though not always, cured by its use. Nothing can restore the hair where the follicles are destroyed, or the glands atrophied and decayed; but such as remain can be saved by this application, and stimulated into activity, so that a new growth of hair is produced. Instead of fouling the hair with a pasty sediment, it will keep it clean and vigorous. Its occasional use will prevent the hair from turning grey or falling off, and consequently prevent baldness. The restoration of vitality it gives to the scalp arrests and prevents the forma-tion of dan truff, which is often so uncleanly and offensive. Free from those reseterious substances which make some preparations dangerous and injurious to the hair, the Vigor can only benefit but not harm it. If wanted merely for a HAIR DRESSING, nothing else can be found so desirable. Containing neither oil nor dye, it does not soil white cambric, and yet lasts long on the hair, giving it a rich, glossy

lustre, and a grateful perfume. Prepared by Dr. J. C. Ayer & Co., LOWELL, MASS.
